Procurement
Management*

Welcome to the **12th Transplant Procurement Management (TPM) Training Course.**

TPM® is the educational brand of DTI (Donation and Transplantation Institute), a non-profit foundation with the mission to advise, train and support professionals from public and private entities worldwide in the creation, development and strengthening of networks, programs and services in the field of donation and transplantation of human organs, tissues and cells.

With more than 30 years of experience, the TPM educational programs provide participants with the scientific knowledge and technical skills to develop their professional competencies as specialists in the field of organ donation, promoting a positive attitude towards it and empowering the detection of potential donors and increasing the referral rates into actual donors.

We are happy to organize the 12th edition of this course together with the Institute for Transplantation of Organs and Tissues of the Republic of Slovenia (**Slovenija-transplant**). It is the result of a long-lasting collaboration together with the aim to improve the donation and transplantation activity in your country.

The program will go through the **clinical process of organ donation**, including new trends and real cases that may help you in your daily work as transplant coordinators or future ones.

We hope it will be a great benefit for your professional development.

Enjoy!

Wednesday, April 9
